Campus**

# Database Systems

## Lecture 8

### Functions of DBMS, DBMS Architecture and Metadata

# Recall Lecture 7

- HDBS (Hierarchical)
- NWDB (Network)
- OODB (Object Orientated )
- RDB (Relational )
- ORDB ( Object Relational)

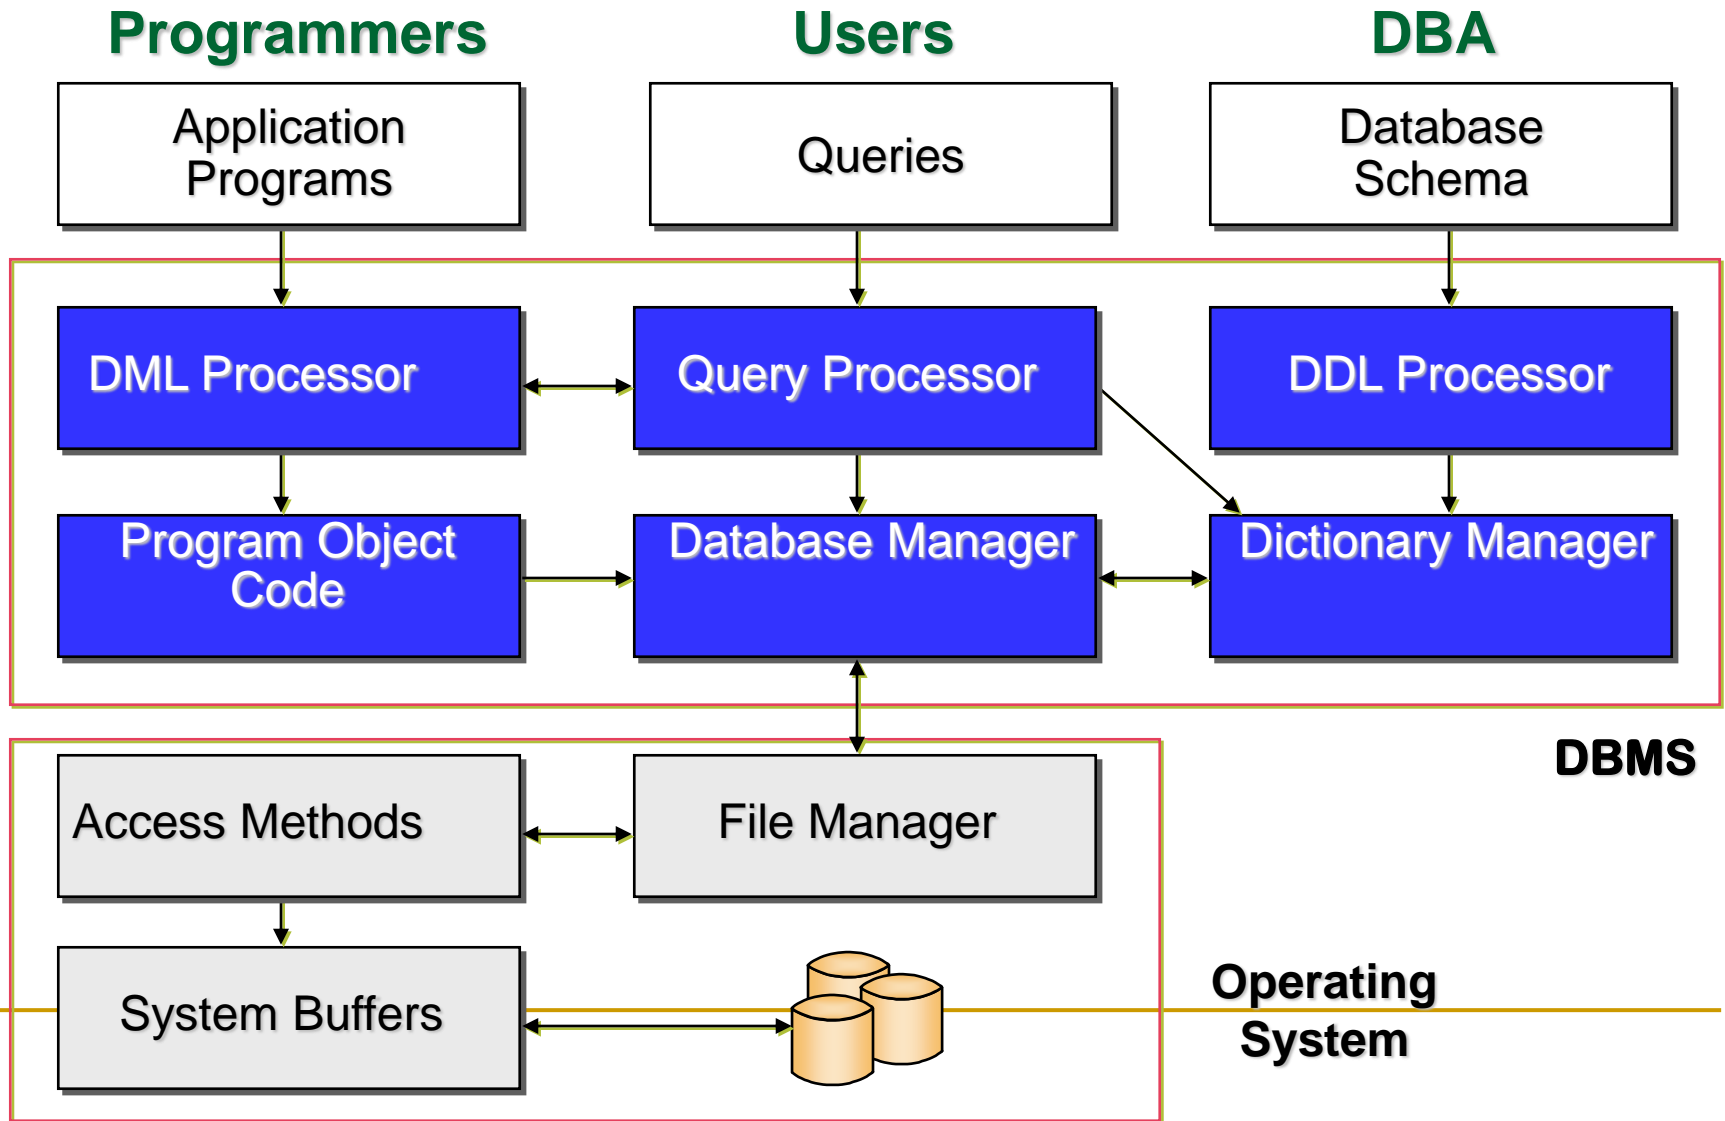

# Database

# Functions of a DBMS

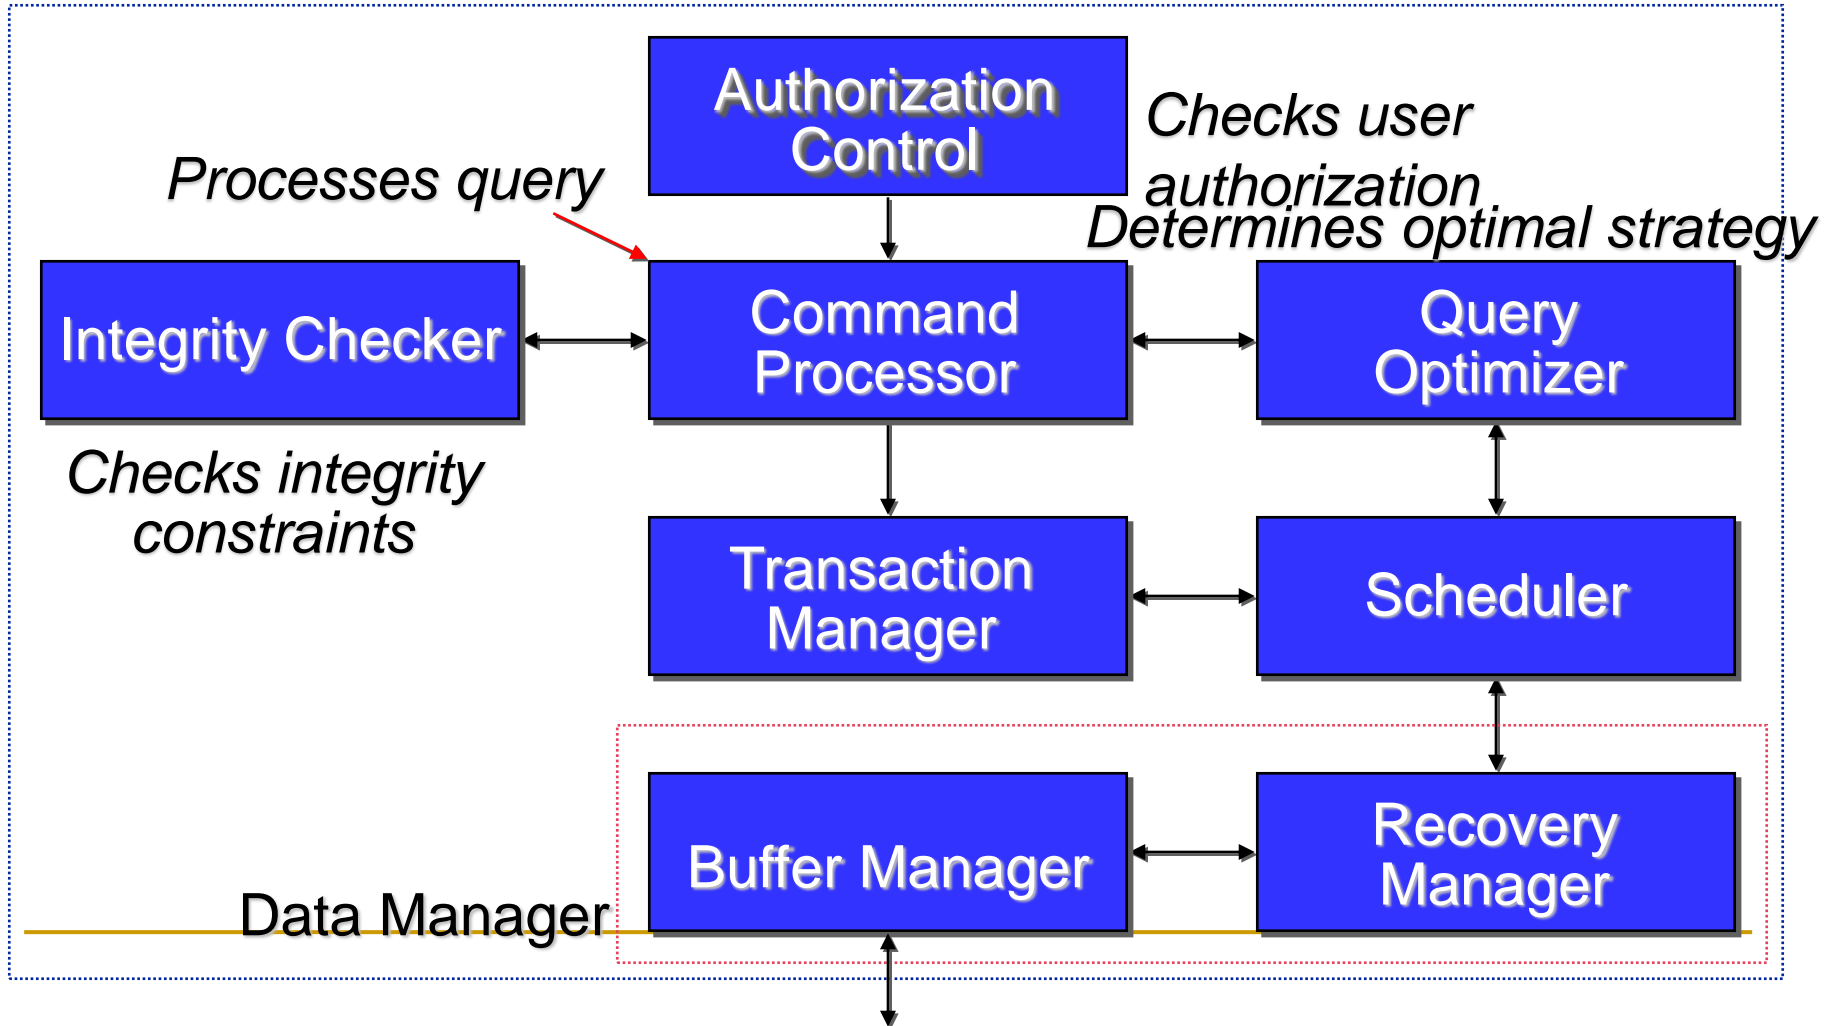

- Data storage, retrieval and update
- User-accessible catalog
- Transaction support
- Concurrency control services
- Recovery services
- Authorization services
- Support for data communications
- Integrity services
- Services to promote data independence
- Utility services

# DBMS Architecture

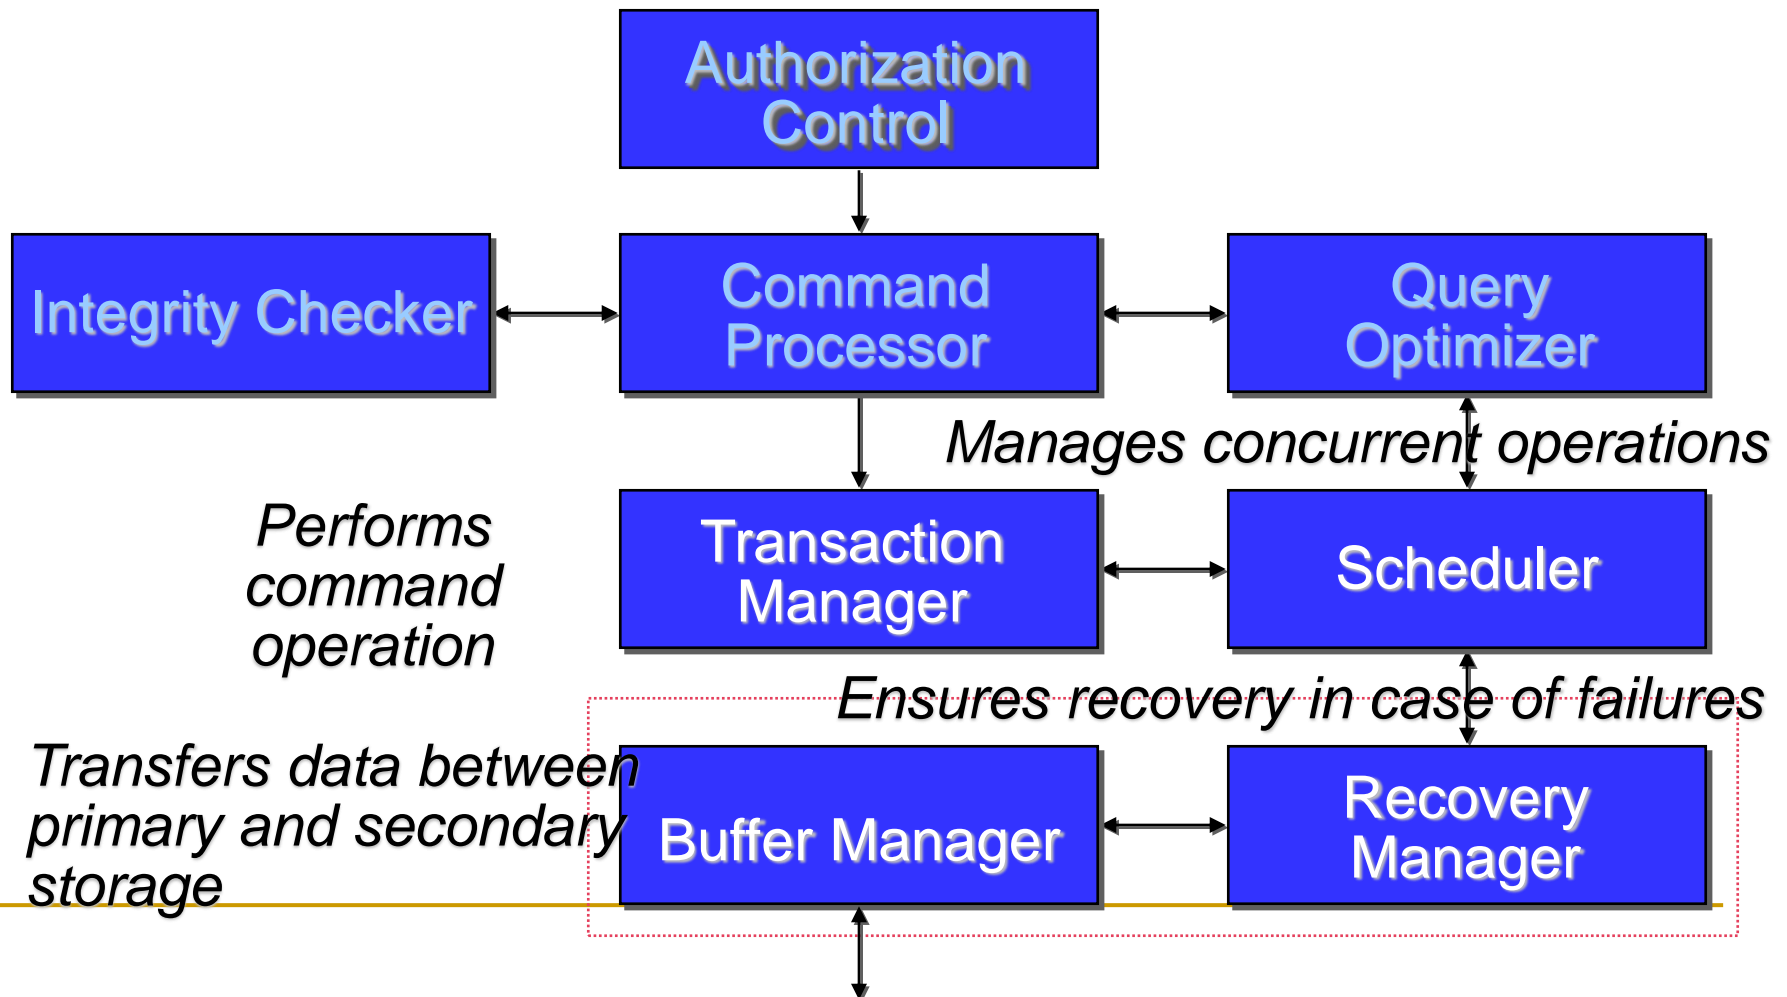

# Database Manager

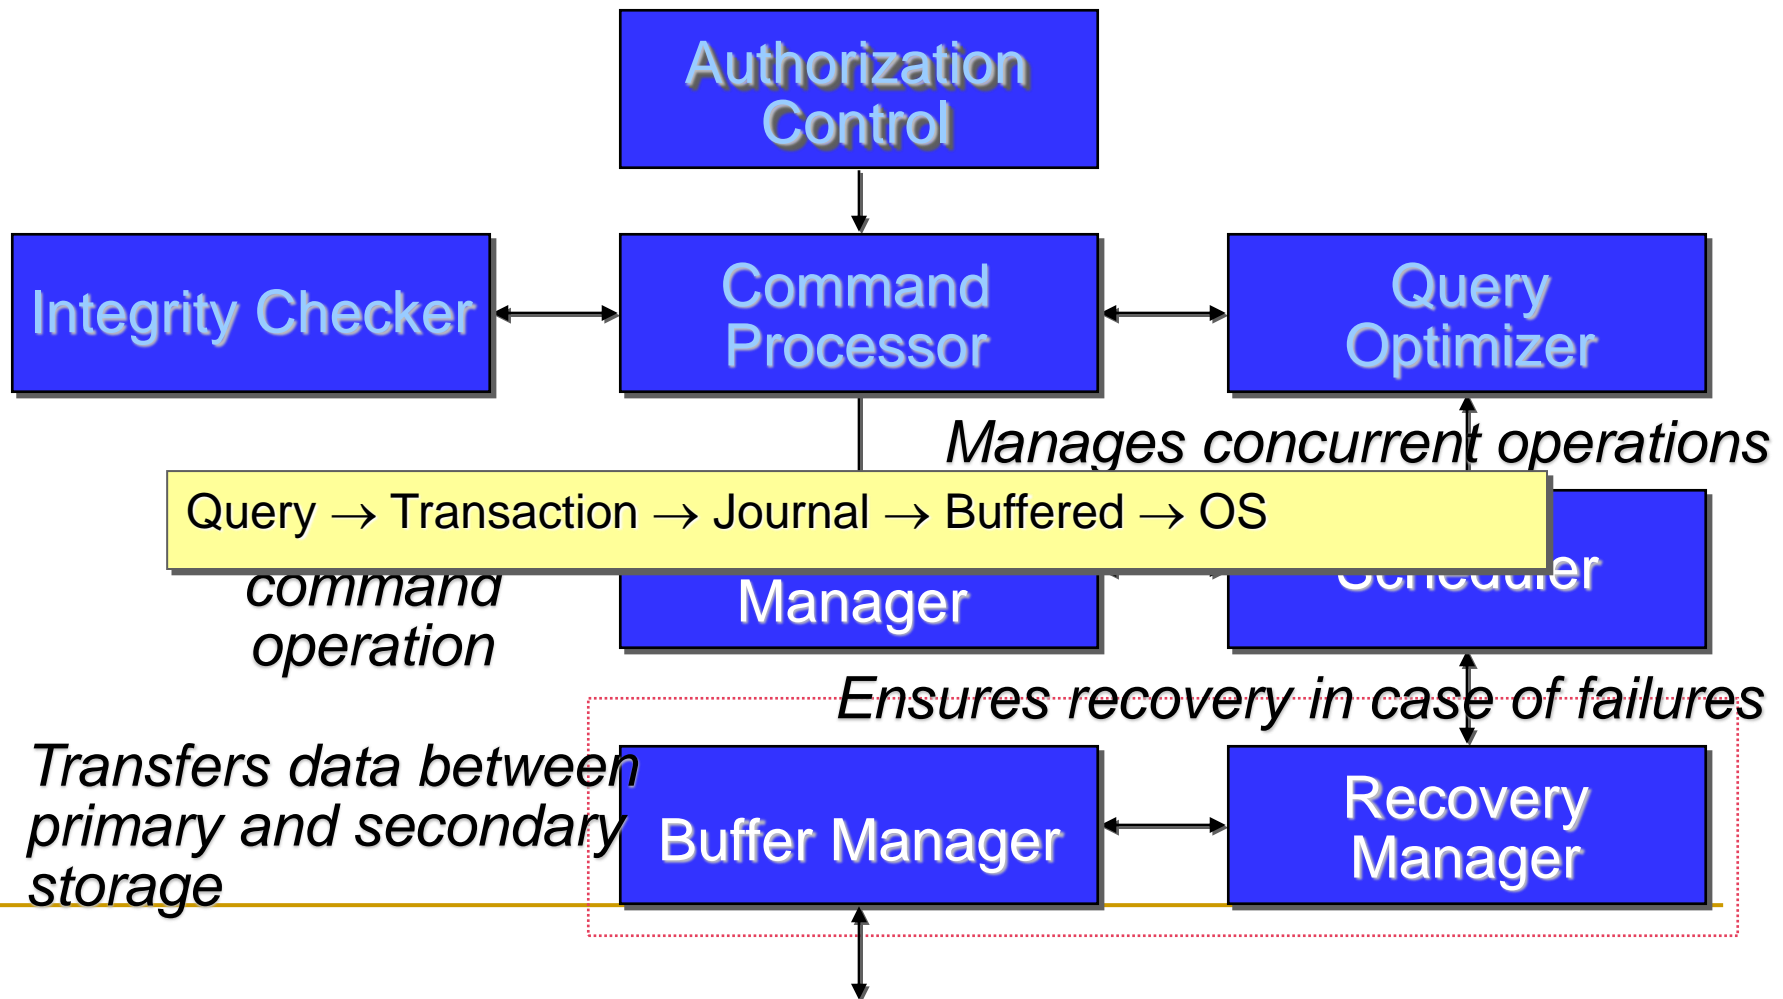

# Database Manager Architecture

# Database Manager Architecture

# Metadata in DBMS

Metadata is the value that leads us to the actual data;

# Types of Metadata

## ■ Technical Metadata

- This type of metadata defines database system names, tables names, table size, data types, values, and attributes.
  - Further technical metadata also includes some constraints such as foreign key, primary key, and indices.

## ■ Business Metadata

- It consists of the ownership of data, changing policies, business rules and regulations, and other business details.
  - This type of metadata is related to a particular business.

## ■ Operational Metadata

- It consists of the ownership of data, changing policies, business rules and regulations, and other business details.
  - This type of metadata is related to a particular business.

## ■ Descriptive Metadata

- Descriptive metadata describes any file, folder, book, image, or video.
  - It may include details of data such as title, author, date, size, author name, published on, and similarly others

# System Catalog (Metadata)

- A repository of information describing the data in the database (metadata)
- Stores
  - Names of users authorized to access the DBMS
  - Names of all data items in the database
    - Types and sizes
    - Constraints
  - Data items and authorization

# Metadata (Example)

employee_id	first_name	last_name	nin	department_id
44	Simon	Martinez	HH 45 09 73 D	1
45	Thomas	Goldstein	SA 75 35 42 B	2
46	Eugene	Comelsen	NE 22 63 82	2
47	Andrew	Petculescu	XY 29 87 61 A	1
48	Ruth	Stadick	MA 12 89 36 A	15
49	Bary	Scardelis	AT 20 73 18	2
50	Sidney	Hunter	HW 12 94 21 C	6
51	Jeffrey	Evans	LX 13 26 39 B	6
52	Doris	Bemdt	YA 49 88 11 A	3
53	Diane	Eaton	BE 08 74 68 A	1
54	Bonnie	Hall	WW 53 77 68 A	15
55	Taylor	Li	ZE 55 22 80 B	1

Data

Metadata

Column	Data Type	Description
employee_id	int	Primary key of a table
first_name	nvarchar(50)	Employee first name
last_name	nvarchar(50)	Employee last name
nin	nvarchar(15)	National Identification Number
position	nvarchar(50)	Current position title, e.g. Secretary
department_id	int	Employee department. Ref: Departments
gender	char(1)	M = Male, F = Female, Null = unknown
employment_start_date	date	Start date of employment in organization.
employment_end_date	date	Employment end date. Null if employee still
